

Looking for an Exciting Summer Research Experience in Science, Engineering or Social Science?

Apply to the Internships in Nanosystems Science, Engineering and Technology (INSET) Program!

Summer Undergraduate Research Experience for Community College Students

Hosted by the California NanoSystems Institute (CNSI) at the University of California Santa Barbara.

This internship program brings science, engineering and social science community college undergraduates to the UC Santa Barbara campus for a summer research experience. Interns gain first-hand experience in scientific investigation in a dynamic, collaborative research environment. They are individually matched with UCSB faculty and graduate student lab mentors who will provide training and support. Interns attend weekly meetings, special seminars, and have the opportunity to develop their presentation skills throughout the summer.

- The stipend for undergraduate interns is \$3,000 total for 8 weeks at 35 hrs/week.
- Free housing and travel costs to and from the UCSB campus will be provided.
- Program dates are June 21 - August 13, 2010
