The Condor Tech’s program invites students who are interested in STEM disciplines to apply for a two week summer experience with UCSB researchers. You will be introduced to what a career in academic research might be like. We offer you hands-on experience working on cutting edge research projects with graduate students in various science and engineering laboratories. The program also emphasizes academic skill development, networking, facility tours, team research, scientific communication and offers a prelude to scientific research for those interested in knowing more about getting a master’s degree or a doctoral degree.

Program Features:

- Stipend: $750 for 2 weeks
- Meals Provided
- UCSB Facility Tours
- Dinner Social with Faculty
- Mentoring
- Career & Scientific Talks
- Social Clubs in Science
- University Transfer Workshop

Online Application Deadline: April 19, 2013
