

Student Centered Funding Formula: Commitment to future “Plan of Action”

Introduction

Oxnard College agrees to develop plans for its effective operation and growth to further advance the obtainment of an aligned systemwide “College Plan for Success” that is numerically measurable with specific timelines for achieving the goals identified in this plan.

Oxnard College’s Plan will focus on striving to achieve the California Community College systems’ goals which include the following:

1. Increase by at least 20 percent the number of CCC students annually who acquire associates degrees, credentials, certificates, or specific skill sets that prepare them for an in-demand job.
2. Increase by 35 percent the number of CCC students transferring annually to a UC or CSU.
3. Decrease the average number of units accumulated by CCC students earning associate’s degrees, from approximately 87 total units (the most recent system-wide average) to 79 total units—the average among the quintile of colleges showing the strongest performance on this measure.
4. Increase the percent of exiting CTE students who report being employed in their field of study, from the most recent statewide average of 60 percent to an improved rate of 69 percent—the average among the quintile of colleges showing the strongest performance on this measure.
5. Reduce equity gaps across all of the above measures through faster improvements among traditionally underrepresented student groups, with the goal of cutting achievement gaps by 40 percent within 5 years and fully closing those achievement gaps within 10 years.
6. Reduce regional achievement gaps across all of the above measures through faster improvements among colleges located in regions with the lowest educational attainment of adults, with the ultimate goal of fully closing regional achievement gaps within 10 years.

The plan will align with the seven core commitments outlined in the “Vision for Change”.

- *Focus relentlessly on students’ end goals.* Getting students to their individual educational goals, whether a degree, certificate, transfer, or specific skill set, will be the explicit focus of Oxnard College (OC). More than just offering courses, OC will be offering pathways to specific outcomes and providing supports for students to stay on those paths until completion.

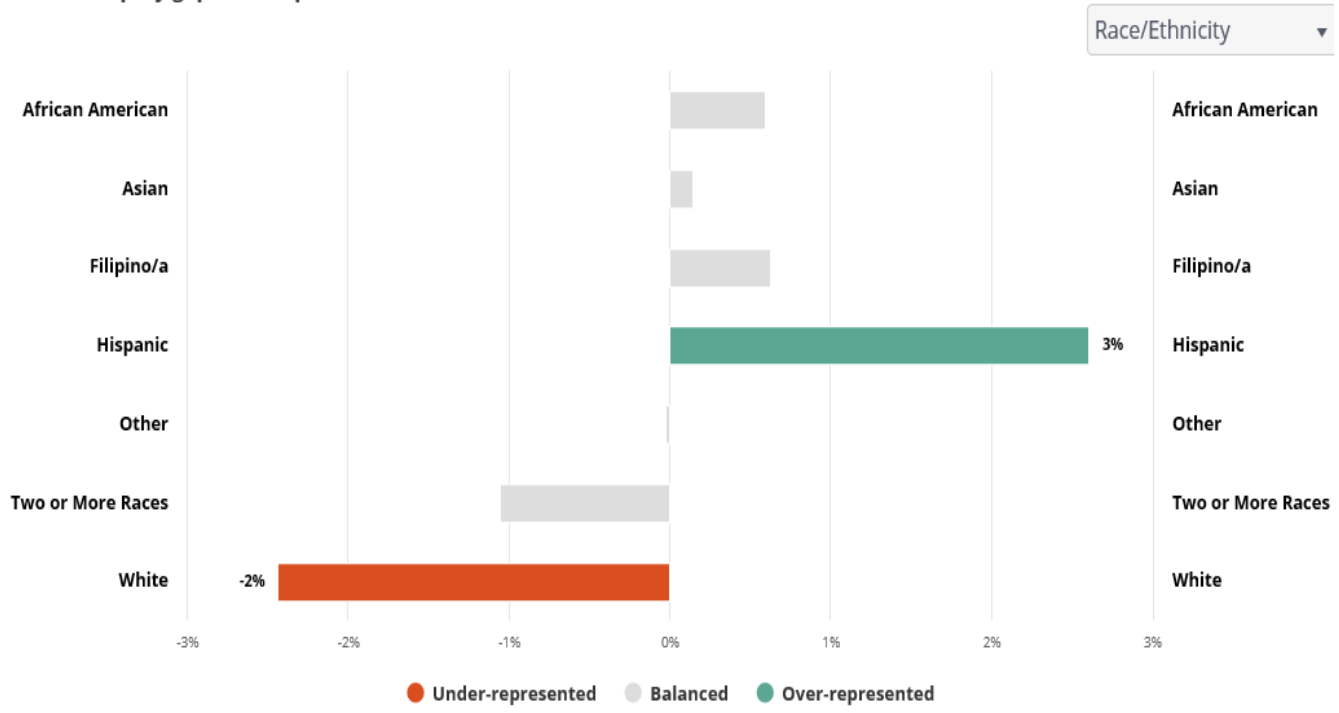

- *Always design and decide with the student in mind.* OC will make it easy for all students, including working adults, to access the courses and services they need.
- *Pair high expectations with high support.* Students will be encouraged to go “all in” on their education, with support to meet their personal and academic challenges. Assessment and placement practices will be reformed so that students are placed at the highest appropriate course level, with ample supports to help them succeed.
- *Foster the use of data, inquiry, and evidence.* Data analysis will be a regular practice used for improving services at all levels, not a compliance activity. Decisions will be based on evidence, not anecdotes or hunches.
- *Take ownership of goals and performance.* OC will be rigorously transparent about its performance, own its challenges, and adopt a solution-oriented mindset to those things it can control. Goals will be used to motivate and provide direction, not punish.
- *Enable action and thoughtful innovation.* Moving the needle on student outcomes will require calculated risk, careful monitoring, and acceptance that failures will sometimes happen. Innovation will be thoughtful and aligned with goals; results should be tracked early and often.
- *Lead the work of partnering across systems.* OC will meet with the other colleges within the District and across the 4-year educational institutions and workforce development entities. By working together OC can strengthen pathways for students and improve results.
