

# ELECTRICAL SYSTEMS FOR HVAC/R

Proficiency Award

(Awarded By The Department)

The Electrical Systems for HVAC/R Program is an award to recognize proficiency in electrical systems for HVAC/R, concepts and practices. The program prepares students to become environmental control technology/HVAC/R technicians to maintain and repair heating, cooling, and refrigeration equipment in residential, commercial, and industrial buildings. Technicians can specialize in either installation or maintenance and repair. *For more information contact: Alan Ainsworth (805) 678-5042*
