

# MECHANICAL SYSTEMS FOR HVAC/R

Proficiency Award  
(Awarded By The Department)

The Mechanical Systems for HVAC/R Program is an award to recognize proficiency in HVAC/R mechanical systems concepts and practices. The program prepares students to become environmental control technology/HVAC/R technicians to maintain and repair heating, cooling, and refrigeration equipment in residential, commercial, and industrial buildings. Technicians can specialize in either installation or maintenance and repair. *For more information contact: Alan Ainsworth (805) 678-5042*
