

PHYSICS

ASSOCIATE IN SCIENCE DEGREE

Physics is the science of matter and its motion, the science that deals with concepts such as force, energy, mass and charge. As an experimental science, the goal in understanding physics is to understand the natural world. In one form or another, physics is one of the oldest academic disciplines; through its modern subfield of astronomy, it may be the oldest of all. Advances in physics often translate to the technological sector, and sometimes influence the other sciences, as well as mathematics and philosophy. The physics program at Oxnard College offers the Associate in Science (A.S.) degree and the Associate in Science for Transfer (AS-T). The courses in this program may prepare students for technician-level jobs or university transfer to Bachelor of Arts or Bachelor of Science degree programs in physics. **University of California Credit Limitation on Transfer of Physics Courses** The UC will give credit for only one Physics series: PHYS R101, R101L & R102, R102L or PHYS R121 & R122 or PHYS R131, R132, and R133.
