Upon successful completion of this program, students will be able to:

- Identify concepts central to the relationship of addiction that lead to significant involvement in the criminal justice system.
- Apply critical thinking to addiction data and become acquainted with the relationship to drugs and alcohol usage and crime
- Identify differences between incarcerated substance abusers and other substance abusers.
- Define all the components of a DUI (Driving under the influence) treatment program.
- Learn how to deliver articulate presentations both written and oral.
- Improve information retrieval and organizational skills including the use of online resources, resulting in the ability to refer clients to the appropriate clinical resources.
