

REU Opportunities University of California, Santa Barbara

Undergraduate Research Internship

Considering a career in science? The Future Leaders in Advanced Materials Program at UCSB brings science and engineering majors from all over the country to UCSB for a summer research experience. The summer 9-week program provides an opportunity for students to develop research projects under the mentorship of faculty and graduate student researchers. Participants actively engage in the scientific community through research, seminars, and professional development workshops.

FLAM: *Future Leaders in Advanced Materials*

Summer research experiences for students from colleges and universities around the country.

- June 17th – August 16th, 2024
- Intern stipend of \$5000
- On-campus housing provided
- Up to \$600 for travel
